Subject: SB 501-504

Dear Senators,

The mere fact that Michigan is surrounded by the Great Lakes is enough for needed legislation to protect it from further contamination and pollution. All sources of pollution, municipal and agricultural are getting out of hand. It seems that things are only done when it becomes epidemic. The reason the State is reactive at this point is because when the warnings were put forth a proactive stance was not taken. I am totally against SB 501-504, the easing of regulations.

Thank You

Louis J. Colletta
